FULL BIO

The Lucky Shots formed in Sacramento, California in 2002, building their sound around the things they still value today: memorable melodies, jangly guitars, fuzz, harmonies, and the energy of a great rock-and-roll song played loud. Drawing from '60s British beat and garage rock, late-'70s Power Pop and mod revival, the band developed a sound that looks backward without becoming a nostalgia act.

Early West Coast performances and an appearance at the International Pop Overthrow festival helped introduce the band to the independent Power Pop community. The Bullseye EP arrived in 2002, followed by their first full-length album, It's The Lucky Shots, in 2005. Touring and international exposure followed, with performances throughout the United States, Spain, and Japan. In 2016, the band released And Have Some Fun!, expanding its melodic garage-pop sound while retaining the hooks and energy of the earlier records.

The current lineup brings together Brent Seavers (vocals, guitar, songwriting), Ted Murdock (vocals, guitar, songwriting), Laura Seavers (bass, vocals), and Andrew Seavers (drums). Murdock joined the lineup in late 2024, and the collaboration led directly to Clearly Opaque, released in November 2025 on Kool Kat Musik. With songwriting shared between Seavers and Murdock, the album moves through Power Pop, garage, mod, jangle, and New Wave without losing the band's identity: concise songs, big hooks, guitars, and a sense that rock and roll should still be fun.
